Technical Skills

Languages and Frameworks: TypeScript, React, Python, Java, NodeJS, Spring, Flask, HTML, SQL

Tools: Microsoft Azure, Git, Docker, PostgreSQL, Firebase, Jira, Asana

Skills: REST APIs, UI/UX, Agile, Scrum, Computer Vision

Relevant Experience

Solution Developer | System Automation | Remote

April 2025-Present

- Lead client discovery and design sessions to translate complex regulatory business processes into technical requirements, identifying edge cases and resolving ambiguous requirements to ensure scalable system designs
- Develop custom React + TypeScript widgets and REST API integrations to extend low-code platform capabilities and enable advanced user interactions with external systems
- Produce technical design artifacts, including data models, workflow diagrams, and solution documentation, to align implementation with client business objectives and support iterative development

Software Developer, Project Coordinator | MBTA | Boston, MA

April 2024-April 2025

- Built and maintained real-time vehicle monitoring application using Node.js, Next.js, and TypeScript, integrating 3rd party APIs to track data for 1500 vehicles, reducing issue response times from several weeks to 1-2 days
- Deployed networking hardware across 1500 vehicles, enabling real-time communication with cloud-based fare collection system processing \$30 million in monthly sales to enhance data accuracy, security, and user experience
- Applied Agile methodologies to conduct software and hardware deployments, facilitating collaboration between internal teams and external vendors to be on track for on-time delivery and nearly \$10 million under budget

Software Engineering Intern | Publicis Sapient | Chicago, IL

June 2022-August 2022

- Engineered a high-performance web application in a team of 4 developers to supply advertisements to in-store displays across over 2200 locations, enabling tailored advertisement schedules based on location-specific data
- Implemented scalable REST API using Java Spring Boot with PostgreSQL to deliver data to React frontend
- Deployed API via Microsoft Azure, leveraging Kubernetes and Docker to ensure seamless integration of codebase
- Led the integration of frontend and backend components to optimize efforts of frontend and backend developers

Software Engineering Intern | Robotic Perception | Tel Aviv, Israel

June 2021-August 2021

- Initiated development of computer vision model using YOLOv5 algorithm applied to 3D, IR, and RGB cameras for automated analysis, resulting in optimally accurate and performant prototype of crop analysis tool
- Trained distinct deep learning models for precise object detection, analysis of crop growth, and disease detection
- Collaborated with hardware team to coordinate effective deployment of computer vision tool on robot prototype

Research Assistant | District 65 Research Group | Evanston, IL

March 2021-June 2023

- Developed optimization model using Python and Gurobi to improve fairness in public school placements
- Spearheaded refactorization of codebase, enabling extensibility and streamlining data flow across the application
- Expanded functionality of frontend visualization tool using JavaScript and Flask to accommodate project needs
- Collaborated with 5 research assistants, applying Agile practices to iteratively test and improve performance

Chief Technical Officer | Student Holdings | Evanston, IL

November 2021-February 2023

- Led development of mobile app using React to streamline operations, reduce user error, and improve efficiency
- Managed 3 tech leads, conducting code reviews to ensure best practices and timely progress across 4 projects
- Mentored new team members in React, HTML, JavaScript, and Firebase to promote key skills and independence
- Presented project updates in monthly board meetings, incorporating feedback into future development initiatives

Education

Northwestern University | Evanston, IL

September 2019-June 2023

Bachelor of Science in **Computer Science**, McCormick School of Engineering

Kellogg Certificate Program for Undergraduates in **Managerial Analytics**

GPA: **3.55/4.00** | Dean's List: 4 academic quarters
